

Profile

Hi, I'm Jaster, a front-end engineer with 3+ yr experience in developing ease of use, mobile-optimized, and secure web applications. My back-end experiences make me can better integrate API into apps.

I'm highly-motivated with a strong dedication to cutting edge technologies and oriented to developing innovative and stable solutions.

With experience in startup companies, I'm familiar with building minimum viable products and doing rapid iteration to help business grow fast.

EXPERIENCE

Sr. Front-end Engineer

Genesis Gaming 2018 – 2020

As a front-end engineer, I work with designer to build promotion SPAs. Also we use data analysis to improve event performance, as a result, we bring 10% increase of players.

I use React to create component-base UI; Webpack to bundle and optimize assets; Use Docker to manage websites and Nginx as proxy server.

I also involve in design Restful API and MySQL Schema.

We run scrum across Taipei, Vegas, Vancouver, mostly speak in English and Chinese.

🔗 HTML5, CSS3(SCSS), Javascript(ES6), React, Webpack

🔗 React-Spring (Animation), Redux / XState (State Management)

🔗 Jenkins, Docker, JIRA

Full-stack Engineer

UrAD 2015 – 2017

In UrAD, we use kanban for product management.

I lead 3 members to work with data analysis team and infrastructure team to build digital advertising management platform.

🔗 Front-end: HTML5, CSS3, Javascript, ES6, Vue, Webpack

🔗 Back-end / CI / CD: PHP7, Laravel, MySQL, Nginx

Full-stack Engineer

HWTrek 2014 – 2015

Participate in an agile startup to build HWTrek – an collaborative platform for hardware innovation.

HW Trek match startup and hardware maker to speed up from idea to product.

🔗 Front-end: HTML5, CSS3, Javascript, React, Redux, Grunt

🔗 Back-end / CI / CD: PHP7, MySQL, Jenkins, AWS

Jr. Full-stack Engineer

iwant 2012 – 2013

Cooperate with UI Designer to recreate a 5-yrs old website: iTry – a service to send out free product samples to do WMR (Word Of Mouth marketing)

Developing back-office and API Design

🔗 Front-end: HTML5, CSS3, Javascript, JQuery

🔗 Back-end: PHP, MySQL

🎓 EDUCATION
